“*By professionals.
For professionals.*”

Thomas Marder – CEO

Schulthess has been the leading Swiss washing technology group since 1845. The traditional company stands for innovation in laundry care and is a pioneer in breaking new ground with the aim of simplifying customers' lives.

Schulthess develops and produces high-quality machines, systems and system solutions for private, commercial and industrial customers in Switzerland. We know the high demands that the appliances have to meet every day under high utilisation. Our products stand out due to their high durability under the toughest conditions, large laundry volumes and strict hygiene and disinfection specifications.

At Schulthess, we promote a culture of self-responsibility, continuous improvement, mutual trust and personal development. We work in performance teams and in a climate of excellence in the context of a world-class company.

The economic and ecological use of resources and the consistent focus on sustainability are our hallmark and the basis of our strong brand position. This is how we generate added value for our customers.

We would be delighted if you were to opt for Swiss innovation with Schulthess.

Our values
are your advantage

01

Quality

means durability.

Schulthess laundry machines are fully designed for durability and developed and constructed for the high demands and long periods of use in commerce and industry. Their robust bearings and strong shock absorbers have been tested on 30,000 loads. We stand for a high level of process reliability and also make your everyday washing work in the professional sector easier with simple operation and economical consumption. You can rely on that.

Machinery directives met

All Schulthess laundry machines conform to Machinery Directive 2006/42/EC, which sets out comprehensive safety regulations for commercial machines. This minimises the potential for danger in commercial laundries and provides operators with comprehensive protection in their daily work.

*Many years of experience, intensive research,
innovative development work – that's how
efficient and durable quality products are created.*

Head of Laundry Technology

Innovation

is evident in the technology.

The Schulthess appliances brim with innovative features that make you radiant and make your daily laundry routine easier.

Smart Control operation

From the smallest to the largest machine, Schulthess appliances have a consistent operating concept. The user interface is logically and intuitively designed and thus easy to use.

Power Blades

The power blades can do it all: Asymmetrically shaped carriers specially designed for Schulthess ensure optimal laundry treatment. Depending on the direction of rotation, they have a different mechanical effect on the various fabrics.

Water Recovery – we care for clean water

With the unique Schulthess Water Recovery function, for example, expensive impregnation chemicals are recovered from firefighters' uniforms and can be reused. This protects the environment – and your wallet.

Hygiene Care programmes

Schulthess offers a variety of disinfection programmes, which are Robert Koch Institute (RKI) compliant. With practical hygiene monitoring, it is possible to prove at any time via the cloud that hygiene regulations have been observed.

Smart Dry function

Our dryers are equipped with Smart Dry, meaning optimal use of waste heat and increased energy efficiency. At the same time, the outer walls are kept cool so that no one burns their fingers. The axial-radial airflow in the dryer also optimises the airflow so that the laundry is dried more gently and quickly.

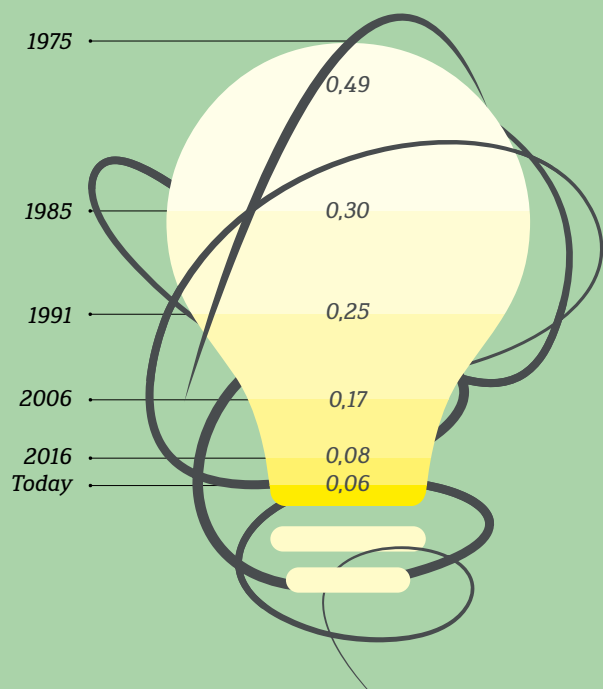

Sustainability

means acting responsibly.

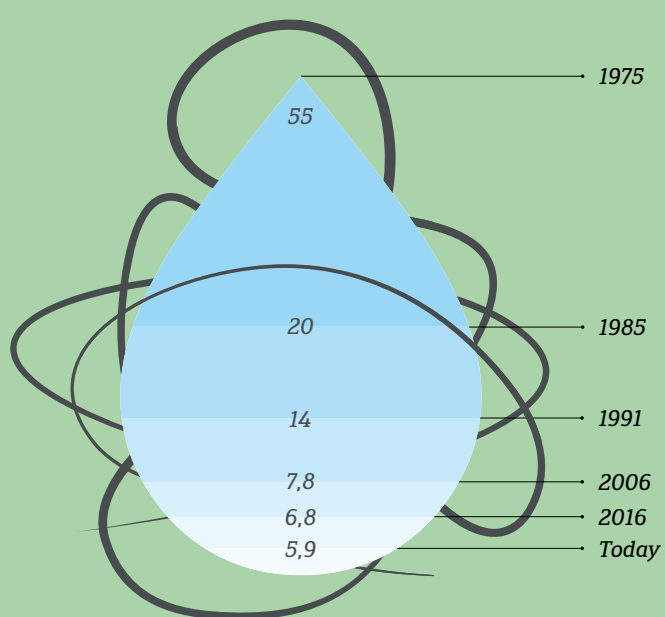

The energy and water consumption of Schulthess machines has fallen almost sevenfold over the last 40 years.

In 1975 a washing machine still needed 55 litres of water per kilogram of laundry; today it is 88 % less, just 6.8 litres. Equally astonishing is energy consumption: In 1975 one kilogram of laundry needed 0.49 kWh, today it is only 0.08 kWh. Choosing Schulthess means taking responsibility for the environment and washing in a sustainable manner.

Energy consumption kWh/kg

Water consumption l/kg

02

Total solution for your perfect laundry

Your expert in washing technology

Schulthess is your laundry partner when it comes to smart laundry solutions for greater efficiency. As an expert, we provide you with comprehensive advice and show you the most modern and ecological solutions that revolutionise the laundry experience. We also offer every conceivable accessory for modern, performance-oriented laundry businesses.

Laundry technology for all areas

From semi-professional washing machines with a load capacity of 7 kg to professional industrial machines with a capacity of up to 120 kg, we have the right product for every application. For every washing machine there is a matching dryer in all sizes, available with exhaust air, gas or heat pumps. We offer our own Swiss-made starLine, topLine and proLine product lines as well as other appliances under the Schulthess brand. These are also of high quality and attractively priced.

Laundry accessories

We are the only One-stop-Shop in Switzerland for flatwork and cylinder ironers, ironing tables and their accessories and finishing equipment such as shirt finishers, universal finishers, trouser toppers, presses and modern drying cabinets from 4 to 20 kg capacity.

You will also find weighing systems such as floor and flatbed scales or products for smooth laundry logistics – such as laundry collectors, laundry bags, spring base, transport and mobile trolleys or mesh roller containers – in all their variants.

Clothing dispensing systems

With our clever clothing dispensing systems, you can guarantee the availability of clothing around the clock with a minimum of effort.

The concept
for the ideal

Laundry

It all begins with expert advice

Independence, speed and fabric-friendly washing are just a few reasons why hotels, restaurants, care homes or commercial enterprises prefer to wash their laundry themselves. This is because the ideally equipped laundry saves money. The prerequisite for this is a precise needs analysis. Schulthess sets up a large number of laundry systems every year and can provide you with optimal advice. Our experts analyse your needs and requirements on site, and your operational and spatial environment, and collect your exact target specifications.

Nothing beats good planning

Once the needs analyses have been completed and the premises have been defined, the Schulthess planning department gets to work on designing your laundry. Which appliances best suit your needs? Which appliance combinations and ergonomic arrangements produce the most efficient results? How can you manage more laundry while saving costs and energy? Which finishing products perfectly complement your washing machines and dryers? Which chemical solutions best suit the selected appliances?

wash-Q-lator - provides transparency and ensures profitability

The Schulthess wash-Q-lator precisely calculates your individual total washing costs including machine investment, electricity, water, detergent and personnel costs. This calculation serves as a basis for deciding whether your own in-house laundry is worthwhile. In most cases, running your own laundry is cheaper than a traditional laundry service.

Perfectly equipped and maintained

Once the planning is complete, we not only deliver your appliances but also set up your laundry perfectly for you. Washing machines are connected and adjusted to your needs. It's best to book an all-round carefree package with extended warranty and maintenance contract. If you have any questions or problems, we have a 24-hour service that is always there for you.

Laundry Academy

At our Laundry Academy you will learn everything about perfect washing. Turn your employees into washing experts and register them for our practical seminars and training sessions. You will learn everything about professional ironing, stain removal and hygiene measures.

Everything from a single source

Schulthess offers you the entire range for hygienically clean laundry from a single source. From collection to washing to service – as a One-stop-Shop, we have the ideal solution for every station in the laundry cycle. For you this is practical – and the savings potential is considerable.

Providing you with greater convenience

A wide range of accessories and technical devices for transporting, weighing, sorting, intermediate storage and warehousing is essential for clean processes in a well-organised laundry.

Always well dosed: environmentally friendly detergents

Together with Schulthess appliances, Flow Professional ensures perfect washing results. Fat solvents, oxygen bleaches, neutralising agents, detergents for delicates and colours, textile finishers or fibre protection and impregnation are perfectly coordinated. And our dosing systems determine the necessary amount. Meaning it's exactly right.

Professional for professionals: washing machines

In the Professional sector, everything revolves around efficiency and the fact that laundry quantities have to be managed in ever shorter times. Schulthess laundry machines are developed and designed to cope with these high requirements.

Quick and easy laundry in the bag: dryers

Schulthess commercial and industrial dryers are high performers in overdrive. They stand for fast and gentle drying with minimal energy consumption and are designed to meet many different needs. Robust, powerful and equipped with segment-specific programmes, they meet every industry-specific requirement.

Keeping it smooth: our rotary ironers

Clean, fresh and perfectly smoothed laundry is the calling card of any business. Schulthess offers an impressive range of rotary ironers with maximum versatility and a fair price/performance ratio.

Perfect to the very end: ironing and finishing

High-quality ironing and finishing systems make your everyday life easier in next to no time. Our range includes easy-to-use ironing machines, ironing tables, dummy finishers, professional irons and related accessories.

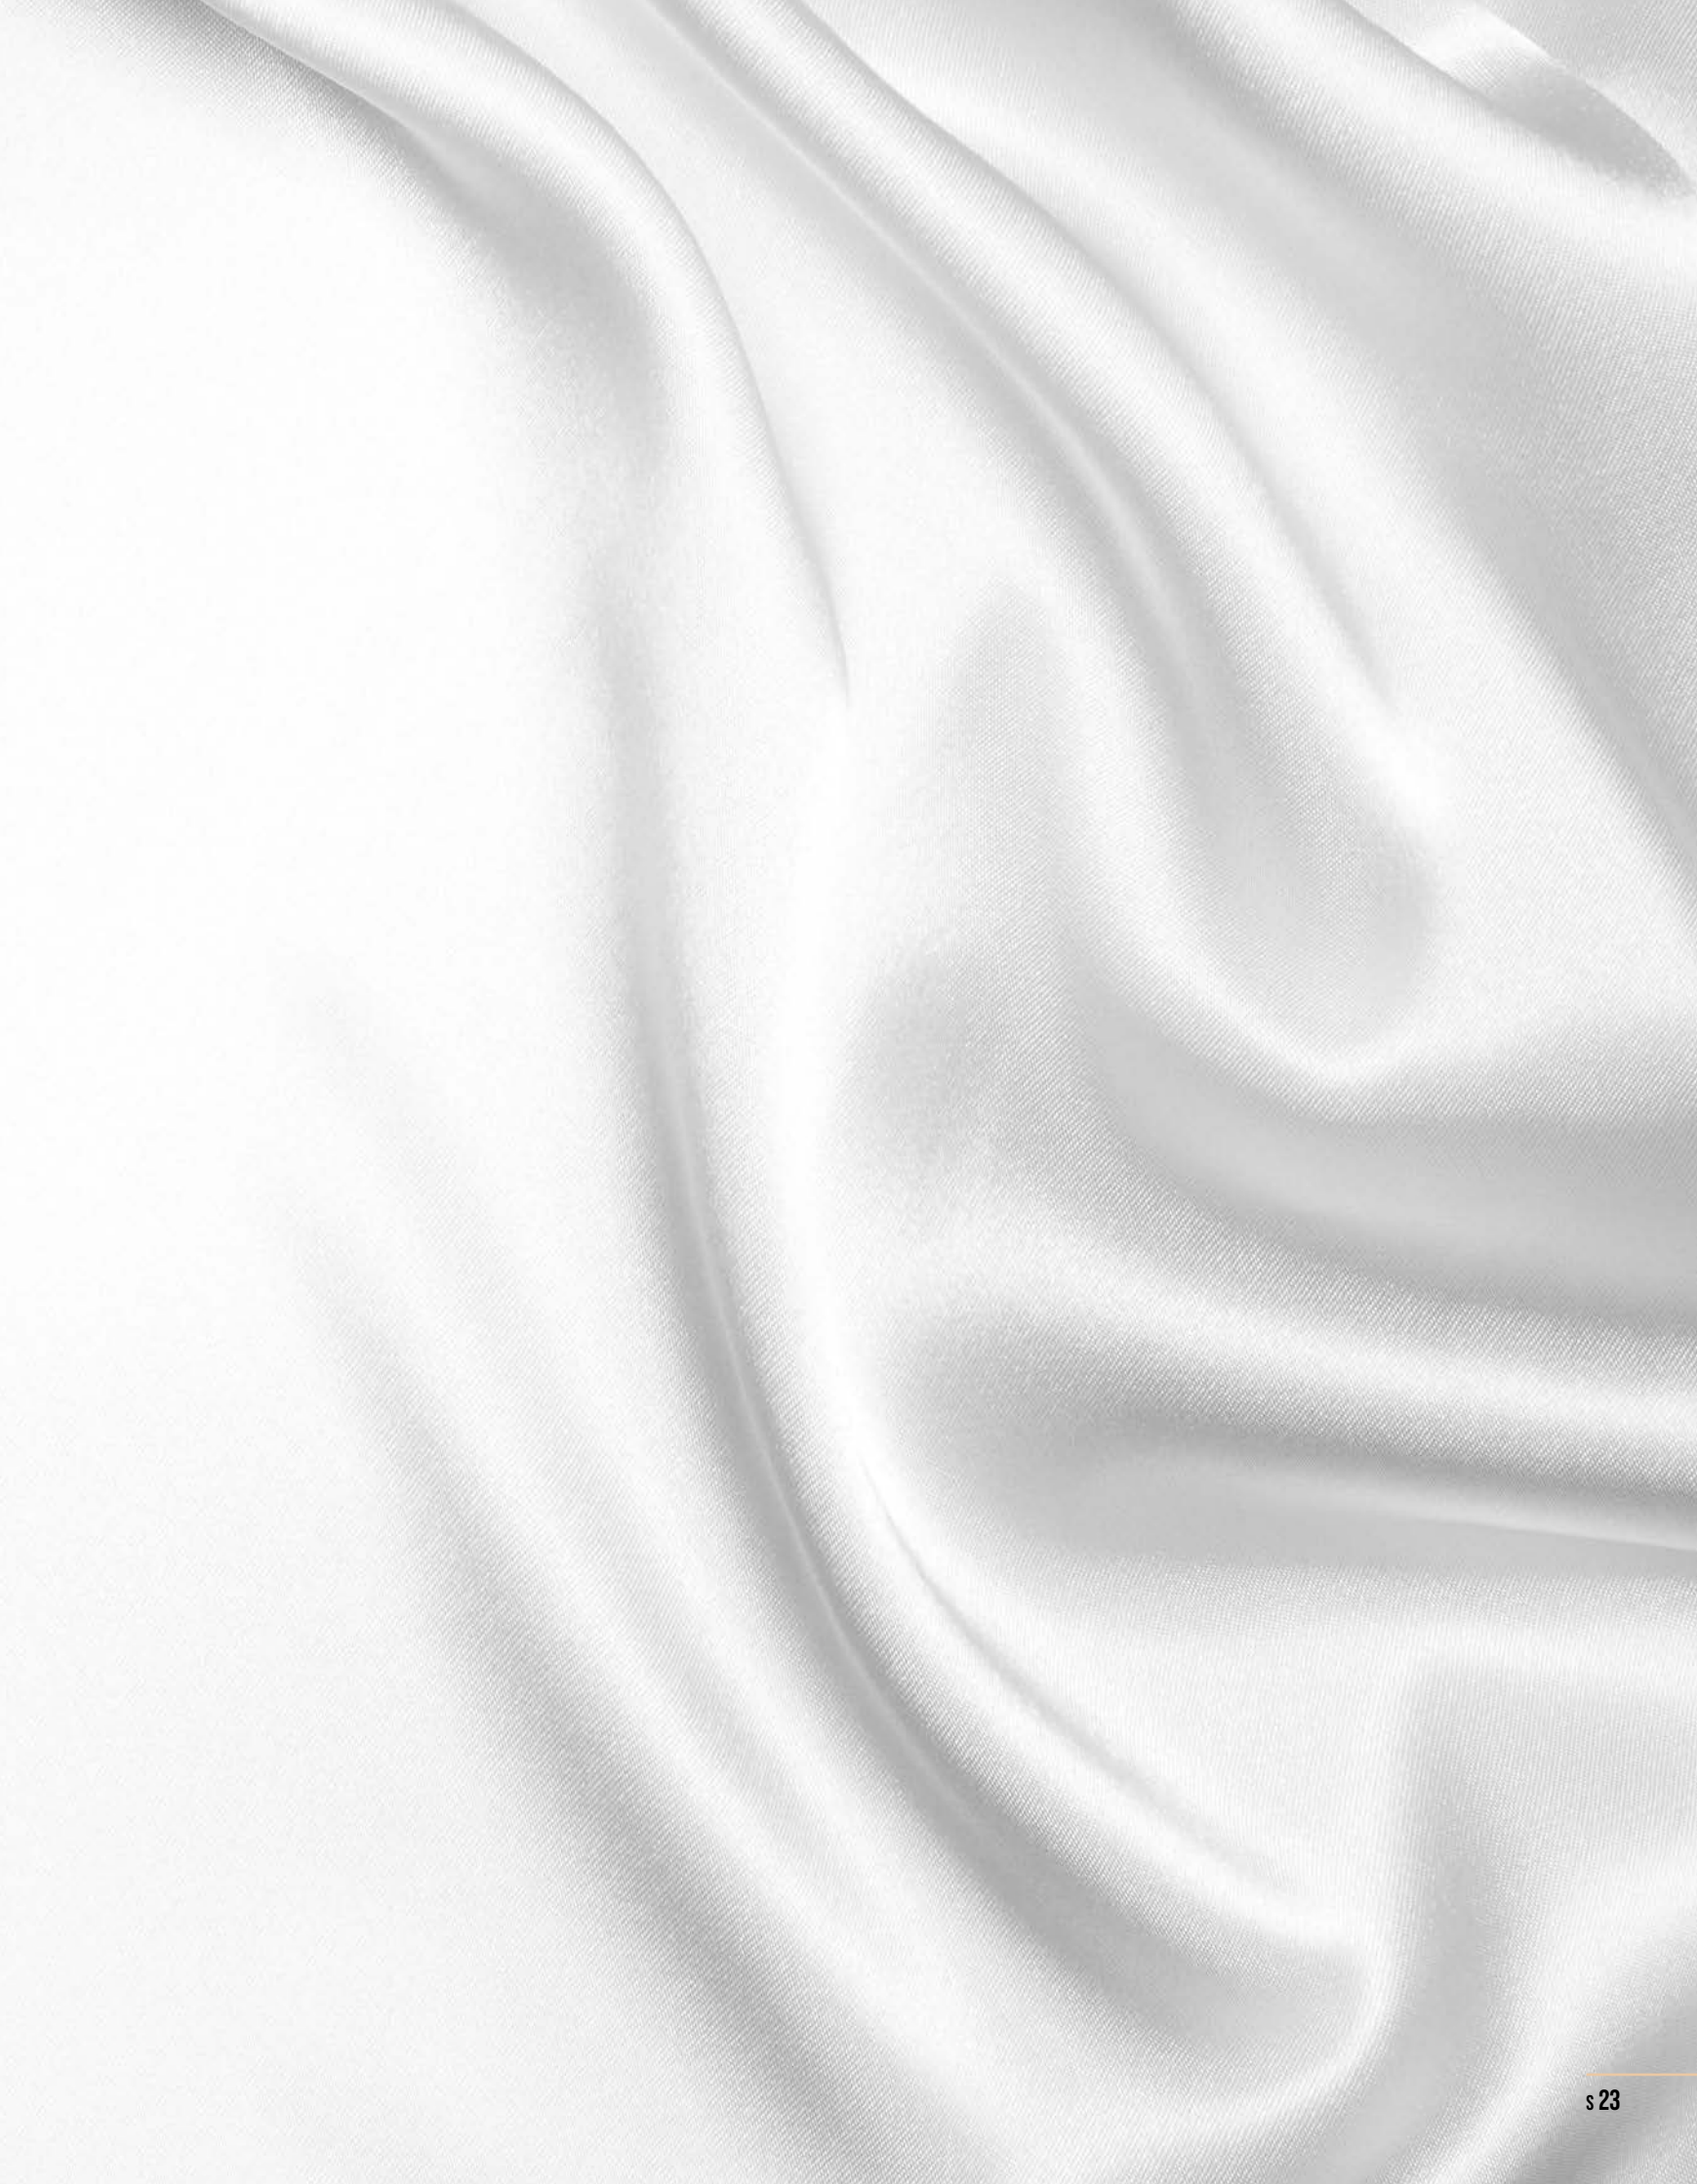

Cleanly distributed all around the world

To get clean laundry back to the people who need it, technical devices are indispensable for smooth processes in a laundry.

The Schulthess multi-brand service: your professional for all eventualities

Schulthess Service cleans, checks and repairs machines of all brands. Professional, efficient and reliable, our service technicians ensure that your appliances last longer, protecting the environment, the machines and your wallet.

Revolutionary dosing technology and environmentally friendly detergents

Save time, detergent, water, energy and personnel costs and keep track of your laundry processes. With Permatest, Schulthess offers fully automated dosing technology with the right liquid detergents. Whether for industrial or commercial fabric care: we have economical liquid detergent systems which, thanks to optimised dosing, significantly reduce your overall costs. You not only save money, but also make a decisive contribution to environmental protection.

Clear and comprehensive control

With the Permatest detergent dosing system, you monitor your machines and processes in real time and in a centralised manner. You maintain an overview at all times and

receive fully automated, detailed reporting and ongoing process documentation.

smartDos

Permatest 4DOS1, 6DOS1, 8DOS1

With the ingenious, ultra-compact dosing system, you have the perfect solution even for small laundries or dry cleaners.

profiDos

Permatest 8DOS4, 10DOS4, 20DOS5

The powerful and reliable dosing system is flexible and scalable. It is suitable for larger laundries up to washing tunnels.

Reliable and built to a high standard

All dosing systems are made of high-quality materials and are therefore almost maintenance-free. The CPU and the control monitor are operated independently of each other. This ensures that the fabric cleaning system functions smoothly even without a control monitor.

Flow - professional liquid detergents

Our new Flow line, together with our Schulthess appliances, ensures perfect washing results. Fat solvents, stabilised oxygen bleaches, neutralising agents, detergents for delicates and colours, textile finishers or fibre protection and impregnation are perfectly matched. And best of all: We deliver our Flow line directly to your door.

Innovative
wash programmes

Care programmes
for gentle

cleanliness

Sensitive fabrics require extremely gentle care. With our diverse wash programmes, we ensure that even demanding materials can enjoy a long life. Even nursing and hospital garments, which need to meet high hygiene and disinfection requirements in everyday use, are not only clean with Schulthess but also germ-free.

wetClean: for your sensitive fabrics

This new way of wet cleaning is ingeniously simple and specially tailored to your highly sensitive fabrics. With the versatile wetClean programmes, almost all materials can be thoroughly cleaned in one load without prior sorting. With this fabric-friendly process, uniforms of fire brigades, outerware and duvets, for example in retirement and nursing homes, restaurants and hotels or hospitals, are cared for in a value-preserving and hygienically clean way.

Extended lifetime

With low consumption figures for electricity and water, the programme also takes the environment into account. The gentle process extends the life of your fabrics and reduces your procurement costs.

Ideal combination

wetClean unleashes its full effect in combination with the drying process matched to the programme. wetClean drying serves as the ideal preparation for the finish. Due to the fabric-specific process technology and the special finish, creasing is very low, which reduces the ironing effort to a minimum.

Disinfection in a gentle way

With the new disinfection programmes, Schulthess, as a leading manufacturer in the field of fabric disinfection, ensures hygienically clean and germ-free laundry. The programmes are particularly suitable for use in retirement and nursing homes, hotels and restaurants, saunas and wellness facilities, as well as in clinics, emergency services, contract cleaning services and other service and commercial businesses.

Your wash-sensitive fabrics such as outerwear or clothing made of wool can be disinfected gently and effectively at the touch of a finger – and thus more easily than ever before. All topLine and proLine washing machines are equipped with disinfection programmes.

Service life extended

Schulthess appliances have precise temperature control and holding times, ensuring that the disinfection process is completed after the main wash cycle. The effectiveness of the programmes has been tested and confirmed by the wfk (Cleaning Technology Institute). All thermal and chemo-thermal disinfecting washing processes of Schulthess washing machines comply with the guidelines of the Association for Applied Hygiene and the Robert Koch Institute.

The small professional for commercial use. With the starLine appliances, Schulthess has developed a robust and powerful series for you, fully tailored to the needs of small businesses and service providers. The machines impress with 52 profiClean programmes, a modern interactive 4.3" colour display and new, simple programming software.

With first-class quality, a long service life and simple control, the machines always ensure smooth operation for you.

Needs-based programmes

Schulthess has expanded its range of segment-specific programmes for you. The 35 additional profiClean programmes are especially geared to the sector-specific needs of, for example, day-care centres, hairdressing salons, doctors' surgeries, beauty salons or small commercial enterprises.

Plinth with fluff filter drawer

Extreme soiling is efficiently removed with the profiClean programmes. Of particular interest for contract cleaners. A plinth with integrated fluff filter drawer additionally prevents fluff from clogging the drain pipes.

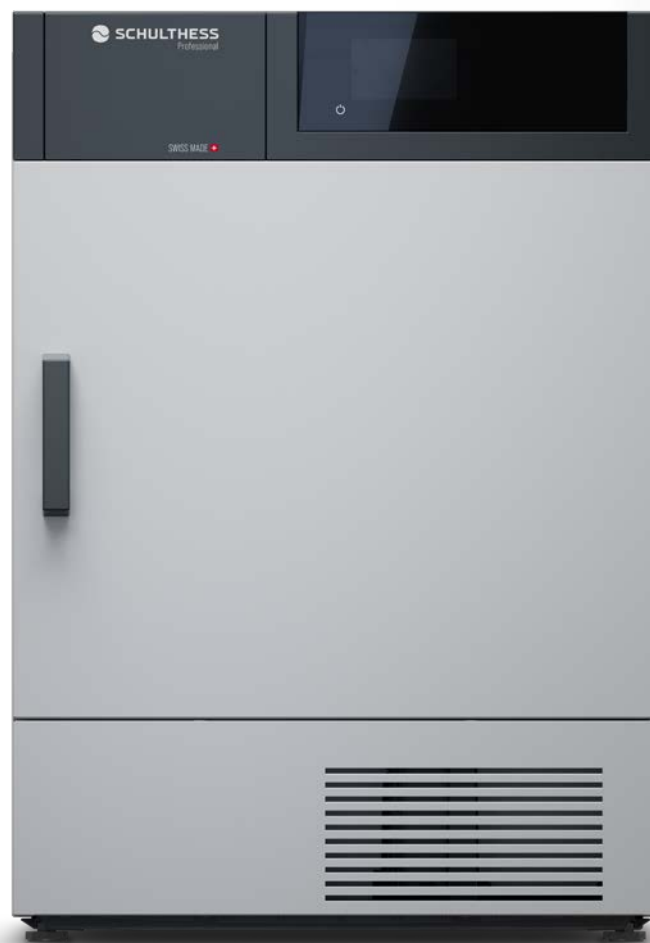

The Power Star

starLine

As an optimal complement to the washing machine, we recommend the starLine TC 7730 condensing dryer with its electronically controlled drying programmes: Cotton Mangle moist, Iron damp, Slightly dry, Cabinet dry, Extra dry, but also Easy care, Time drying or Mixed laundry. The condensing dryer offers further optional programmes for shirts, blouses, silk, wool, outdoor clothing, down fabrics, towels and impregnation.

- Load capacity 7 kg
- Stainless steel drum
- Electronically controlled and timed drying programmes
- Residual moisture measurement
- Condensation system

The Visionary

topLine

In the commercial and industrial sector, everything revolves around efficiency. Modern technologies and the extended range of 94 professional segment-specific profiClean programmes ensure excellent results with the topLine. Four programme families (Homecare, Businesscare, Sportswear and Antibac) and new, fast disinfection and express programmes offer you even more plus points. And using the USB interface, you can even install an additional 24 of your own wash programmes, fully oriented towards your specific user comfort, efficient processes and cost-effectiveness.

3D-Washing for perfect results

With its six specially shaped and intelligently arranged 3D drivers, this Schulthess washes in a new dimension. The 3D-Washing adjusts the washing mechanism individually and precisely to your type of laundry, the load quantity and the degree of soiling and guarantees perfect washing results with maximum preservation of the value of your fabrics.

Smart Control operating field - logical and even simpler

At a glance, you understand how your appliance works. Thanks to the clear touchscreen, you can quickly find and select the right programme. The large 4.3" colour display is particularly easy to read and communicates in 23 languages.

Plinth with fluff filter drawer

An intercepting tank with integrated fluff filter drawer in the plinth prevents fluff from entering and clogging the drain pipes when washing mop covers. To remove the fluff, all you have to do is pull out the drawer.

Practical liquid detergent connection

A liquid detergent connection enables you to control up to eight dosing pumps, which can be mounted at the rear of the machine to save space if desired. This eliminates the need for wall mounting and the appliances can be freely repositioned at any time.

The Visionary

topLine

topLine dryers

topLine dryers are designed to handle large volumes of laundry in the shortest possible time. With the innovative drum system and 10 selectable special programmes, you get a very gentle, crease preventing and even result.

Minimal space requirement

topLine appliances are extremely space-saving and compact. With the tower kit, the washing and drying appliances can be stacked on top of each other on only half a square metre.

Integrated residual moisture measurement

During the drying process, the residual moisture measurement built into the drum system continuously checks the laundry moisture. When the selected drying level is reached, the programme ends automatically.

Quiet operation

The Supersilent noise insulation makes the professional Schulthess dryers pleasantly quiet when in operation.

A fingertip is all it takes

Ten special programmes can be selected at the touch of a finger. The same applies to the language selection button: 23 languages – from English, German and Spanish to Polish or Russian.

Easy handling

Loading and unloading the dryer could not be easier: the door hinge is on the right or left as desired, and the opening angle is a comfortable 180 degrees. The interactive 4.3" colour display ensures easy operation.

- Load capacity 8 kg
- Edeltrommel
- Electronically controlled and timed drying programmes
- Residual moisture measurement
- Exhaust system (TA)
- Condensation system (TC)
- Condensation system with heat pump (TW)

Powerful duo

To make the washing and drying process even more efficient, Schulthess has perfectly matched the programmes and running times of the topLine dryers to the topLine washing machines.

topLine

Swiss Mop Cleaner

topLine und proLine

The machine for contract cleaners

Schulthess also offers professional solutions for the hygienic cleaning of mop covers and cleaning cloths. Our Swiss Mop Cleaner machines effectively and thoroughly remove dirt, germs and pathogens from mop covers and microfibre cloths. They are therefore the ideal partners for cleaning floors in hospitals, schools, office buildings, commercial enterprises, wellness centres, saunas or in retirement and nursing homes.

autoClean self-cleaning programme

The 10 profiClean programmes, specially adapted to the needs of contract cleaners, guarantee efficient and gentle washing of all fabrics and can be programmed up to 100 hours in advance, which increases machine utilisation and productivity. The autoClean self-cleaning programme cleanses the drum, detergent tank, heating elements and detergent dispenser hygienically clean in just 25 minutes and automatically signals when the machine needs cleaning. This prevents disruptions in the operating process due to dirty machines and reduces servicing and maintenance costs.

Plinth with fluff filter drawer

Thanks to our professional programmes, fabrics are cleaned gently and hygienically. We also have optimal solutions for the special requirements of contract cleaners. Special wash programmes clean mops down to the pores, while the fluff filter drawer ensures that drain pipes do not become blocked. For regular cleaning, the drawer can be conveniently pulled out and the filter removed.

The Game Changer

proLine

Washing records with hygiene guarantee

The latest generation of our commercial and industrial appliances is fully adapted to your industry-specific needs and is state of the art. With the multilingual operation and the versatile profiClean programmes, professional cleaning is guaranteed. In addition, wetClean offers you an environmentally friendly way to wash delicate fabrics gently. And thanks to disinfection programmes, germs don't stand a chance.

Save time and cut costs

Saving time while getting more done, cutting costs and protecting the environment at the same time has never been easier. With the fastest wash programmes currently available, you can do up to 500 more loads a year and save more than 10% electricity per wash. Thanks to the perfectly coordinated programmes of the proLine from Schulthess, you can now wash faster and more economically than ever before. And of course, the high-quality industrial appliances for professionals are as robust as ever and thus extremely durable – typical Swiss quality products.

Hygienically clean laundry – black on white

Our new hygiene monitoring function stores all the relevant hygiene data from every wash cycle: date, time, programme, target/actual comparison of water temperature, speed, water level in the appliance, liquid detergent pumps and heating. The data can be downloaded on USB and then visualised.

Never lose laundry again

The new laundry slide from Schulthess

When removing laundry, small and fine laundry items often fall into the narrow gap between the housing and the inner caustic tank. There they can get jammed or even disappear completely. The laundry slide from Schulthess provides the remedy: It bridges this gap and ensures convenient and problem-free laundry removal.

The Game Changer

D200 / D325 proLine dryer

smartDry – a revolutionary way to save money and time

The proLine dryer also keeps its promise in terms of quality. Thanks to its new axial-radial airflow, it enables extremely fast drying – in an average time of 25 minutes. Its precise and reliable residual moisture measurement also eliminates the need for additional drying, and the laundry can be folded immediately or passed on for mangling or ironing. Pretty smart, because that not only saves time but also cash.

- Load capacity 11 kg / 18 kg
- Drum capacity 200l / 325l
- Precise residual moisture measurement
- Robust construction for high durability
- Fast drying times
- Low energy consumption
- Quiet, <60 db(A)
- Reversing drum
- Fluff filter drawer
- Internal heat recovery for shorter drying times

Product information sheets available at Schulthess.ch.

proLine

The practical fluff filter

Where there is a lot of drying, regular machine cleaning is also essential. With the Game Changer an easy job! Its fluff filter drawer can be removed ergonomically and conveniently from the front, and the degree of soiling is immediately visible. It is easy to clean it in just a few seconds and ready for use again. For machines in laundrettes, there is an optional lockable version with a lock right next to the handle.

Payment systems

06

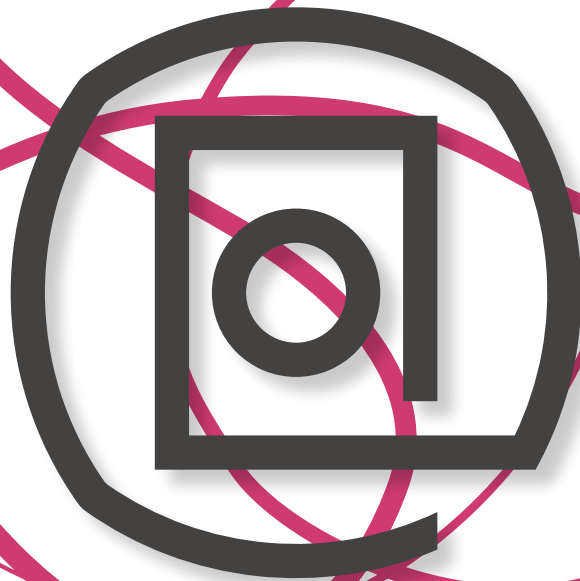

SCH

Digital

payment with
washMaster.

washMaster - the new digital payment system

With washMaster, you have the master plan for cashless payment in the laundry room. This means that the users' machine use is simply billed digitally. Card charging via the janitor, time-consuming checking and accounting of washing services are no longer necessary. An overview of use is available at a glance at the touch of a button. Another convenience: With washMaster Professional+, users book their washing appointments digitally. The master plan for neighbourly cooperation.

With card or small change - payment made easy

Operating costs for laundry care in communal laundry rooms are apportioned in accordance with the user-pays principle – secure, fair, straightforward. Schulthess offers the right payment system for every need and makes laundry room billing transparent.

Cash or with card? Two systems are available:

Unique and transparent PrePaid system

The Schulthess PrePaid Card can be loaded by the janitor conveniently with special PC software on the computer or directly at the machine. Its use is contactless and wireless using an RFID chip, which enables reliable data transmission without wear and tear (e.g. of the magnetic strip). This new system can be integrated into all topLine models on request or retrofitted as a wall-mounted card reader.

Single or twin?

For example, if you want to connect a washing machine plus a dryer, the twin card reader is recommended (can also be combined with a room air dryer).

This is how it works:

- Select programme
- Read programme price on display
- Insert the card into the slot
- Programme costs are debited
- Ready

Proven coin system

Easy to use and reliable in operation, the Schulthess coin-operated machine is also an option among the payment systems. This can be used to operate connected machines with coins and to read off the remaining washing and drying time on the display. Advantages for the janitor are the simple programming and emptying of the cash cassettes.

Laundry technology
& accessories

Smooth to the finish

Clean, fresh and perfectly smoothed laundry is the calling card of any business. Finishing appliances from Schulthess impress with quality and an attractive price/performance ratio.

Rotary ironing

Robust, durable, powerful, fast, user-friendly and safe – flatwork and cylinder ironers from Schulthess are ideal for use in commerce and industry. The range includes units with roller lengths of 1 to 2.5 m and more, with a roller diameter of 25 to 50 cm and more.

Ironing

With Schulthess ironing products, everything is guaranteed to run smoothly in professional laundries. Height-adjustable ironing boards for ergonomic work, ironers, steam generators and practical accessories ensure perfectly ironed laundry.

Finishing

The Schulthess finishing range includes powerful and energy-saving multiform finishers, trouser toppers, comfortable and fast shirt finishers, powerful and quiet universal finishers, fast and optimally drying collar and cuff presses, powerful folding presses, steam generators with the highest safety standards and compressors for various consumers in the laundry. This makes finishing easy and the result is impressive.

Gentle drying

The drying cabinets dry clothes and other items with warm air. The steamed air is evacuated through a ventilation duct or condensed with heat pump technology. Clothes that should not be dried in the dryer (about 40 to 45% of all fabrics) can be dried in the drying cabinet. As the drying cabinet dries the clothes without mechanical action, the life of fabrics and clothes is extended.

Working in an ergonomic, organised and efficient manner

Every laundry needs the right additional equipment for rational and hygienic processes. Schulthess offers a wide range of aids and technical equipment for collecting, transporting, weighing, sorting, intermediate storage and warehousing.

Hygiene, cleanliness and well-coordinated processes are vital in the healthcare and hotel industries. Schulthess offers aids and technical equipment for these essential processes.

Clothing dispensing

Intelligent garment management that cuts costs. If this is also an issue for your company, then LCT-Textelligence is the optimal solution. We offer a wide range of products from Chiptex and Walk'n Closet.

Workwear dispensing and management

Insight and manageability are the watchwords at LCT-Textelligence when it comes to garment management, automated garment dispensing and pick-up. Solutions for providing hanging or folded garments, this on different RFID platforms, remain the standard. All LCT systems have these three features, among others:

Hygiene

All systems take the hygiene aspect into account. Depending on the system type, the workwear can be packaged and, if desired, provided with an expiry date. This guarantees a high level of hygiene.

Cost savings

LCT solutions efficiently match supply and demand. This leads to cost savings in fabrics and working hours.

24/7

Service availability, continuity and reliability: this is what these solutions stand for, which can be used 24 hours a day, 7 days a week without interruption.

08

Professional service

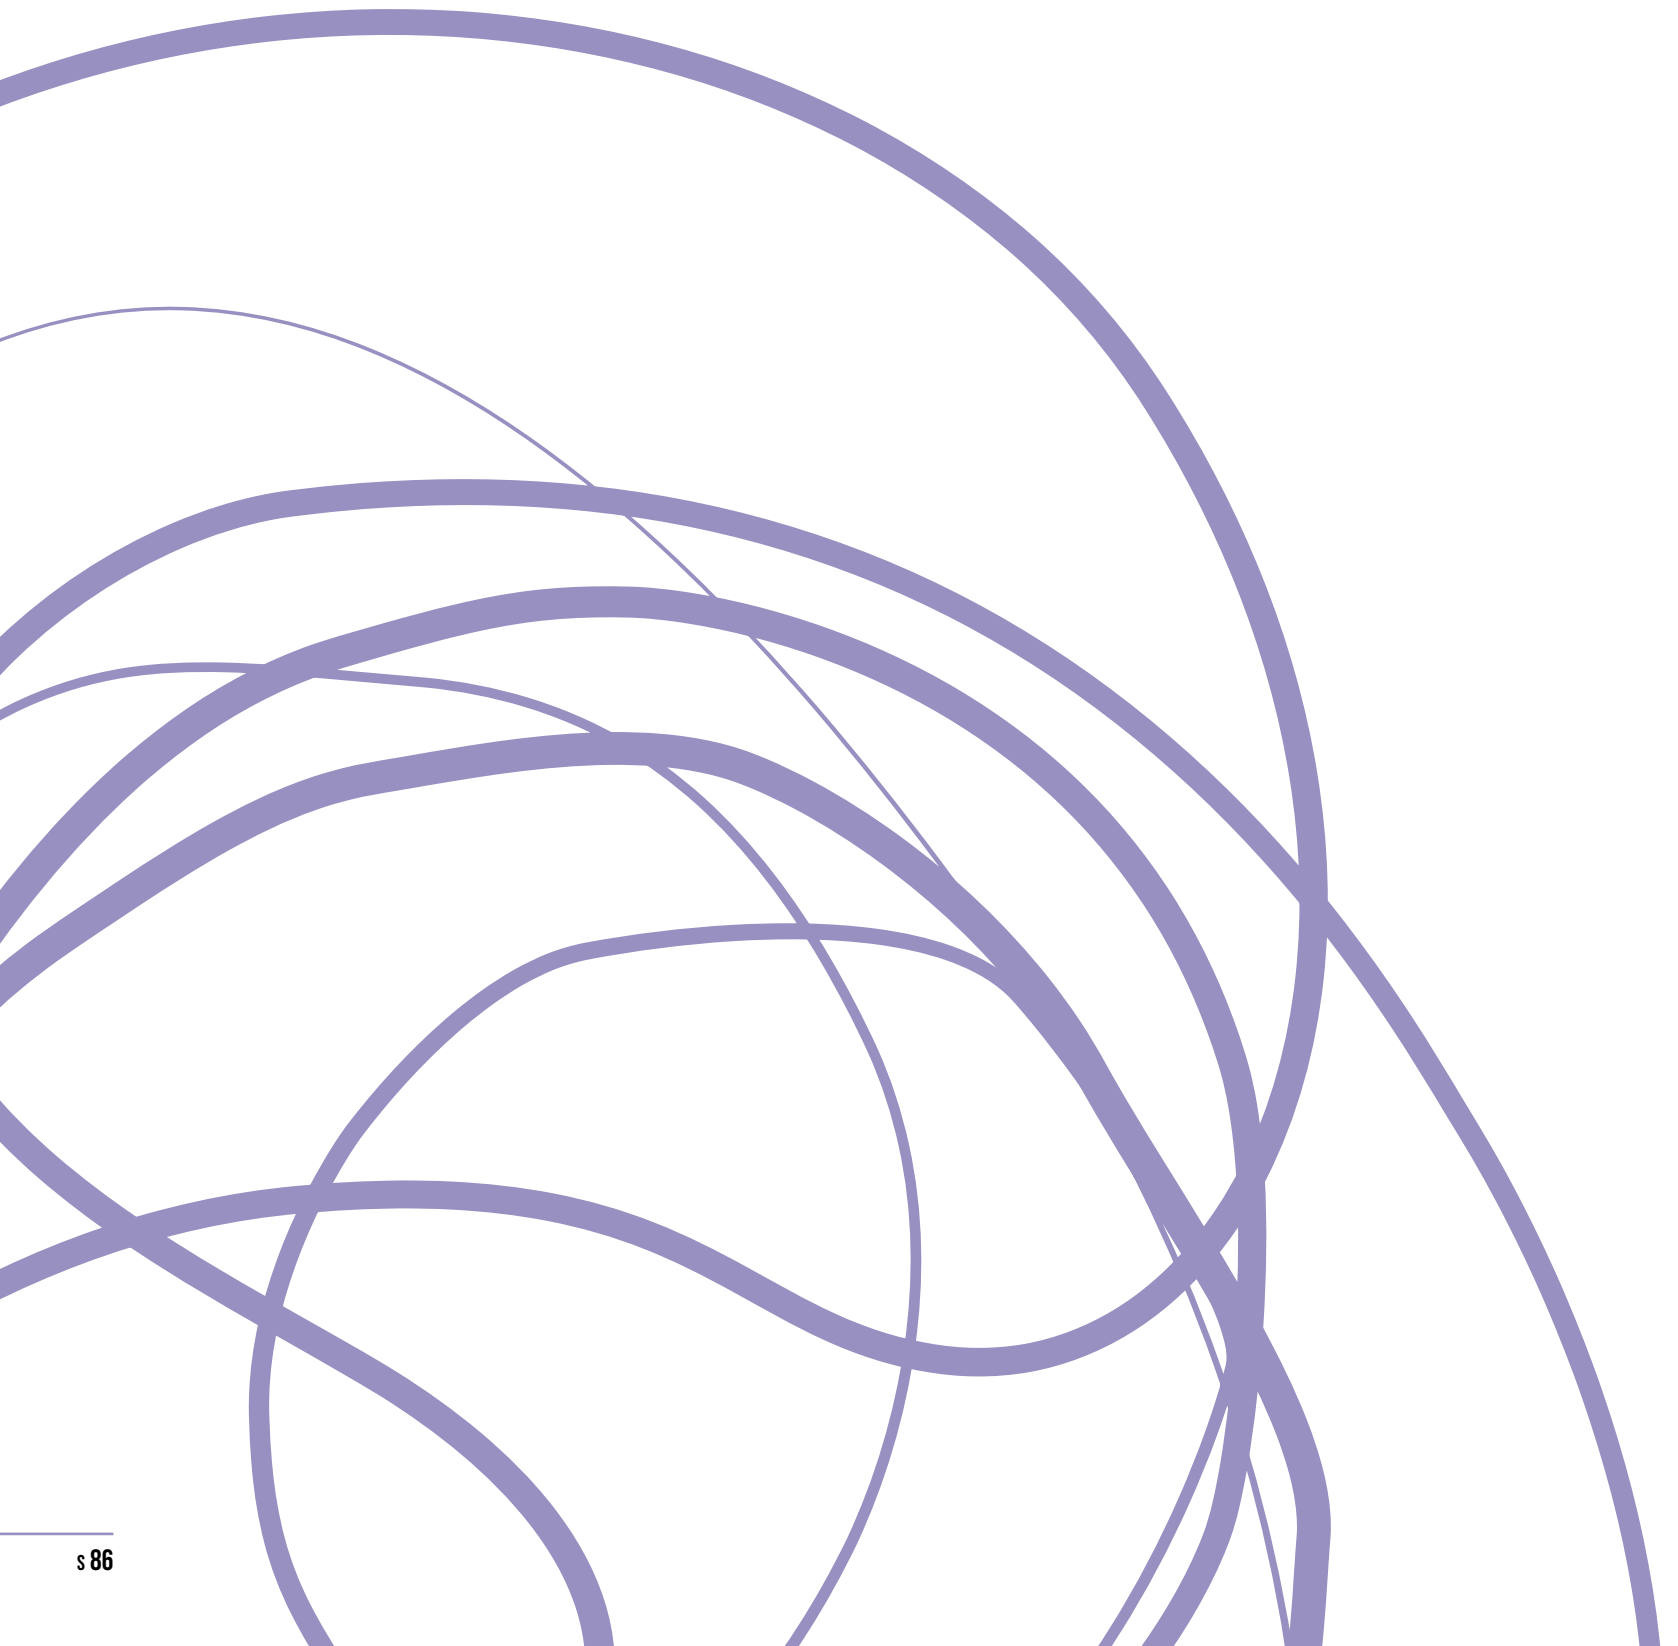

The all-round service

Professional service 24/7*

With the right maintenance at the right time, you not only extend the service life of your machine, but also ensure the reliable operation of your laundry. This is easy on your nerves, saves electricity and water and prevents unnecessary costs from cropping up. And if something should not run as usual, our promise applies: your machine will be repaired within 24 hours*.

* This service is guaranteed by Schulthess in Switzerland. Outside Switzerland, the service conditions of certified Schulthess partners apply.

Service at its best, professional and reliable

Call centres – personal and straightforward

Our trained staff will help you with any faults, advise you personally and arrange any service appointments. Our call centres are distributed throughout Switzerland by language region so they are always close to you.

Service technicians – punctual and professional

As a manufacturer, we know our appliances best. Our fully trained service technicians will solve your problem – 92 % of the time on the first visit.

Service organisation – fast and high quality

As we develop and produce our appliances in Switzerland, first-class quality is guaranteed without fail. In our central warehouse in Wolfhausen, we have easy access to the most important spare parts and can ensure fast delivery, even overnight.

Comprehensive advice

Our service technicians will advise you on all aspects of our services as well as on environmentally and economically sensible modernisations.

Troubleshooting – prompt and reliable

Our more than 100 service technicians are on duty throughout Switzerland. In the event of faults, they will be quickly on site and rectify them within 24 hours. All this makes our customer service a proud award winner.

Bespoke service contracts

Maximum reliability and value retention of your machine at fixed calculable costs.

Guaranteed safety

Carrying out the electrical safety test according to VDE guidelines.
